SUMMARY

Graduated in computer engineering with expertise in full-stack development. I am looking for a permanent position in a stimulating environment where I can continue to learn and provide innovative solutions. With several experiences in business and personal projects, I master the entire software development cycle and am motivated to take on new challenges.

SKILLS

Languages: Java, TypeScript, JS, Python3, PHP, HTML, SQL

Technologies: Angular, Spring Boot, React, NodeJs, Symfony, Docker, Kubernetes, Jenkins, Nexus, Jest, SonarQube, PostgreSQL, MongoDB

Cloud: AWS, Firebase

EDUCATION

2023 - 2024	International mobility Program	ISEP PARIS
2021 - 2024	Computer Engineering Diploma	ESPRIT
2019 - 2021	Preparatory Cycle	IssatSo

EXPERIENCE

- 2/2024 - 8/2024 **Full Stack Web Developer | DevOps - Intern** ORANGE, Paris
- Designed and implemented +25 new features and resolved +10 bugs by developing and testing both front-end back-end and components for the PaaS portal.
 - Created and optimized database update scripts and automated email notifications for account status changes, streamlining administrative processes.
 - Automated CI/CD, managed infrastructure and streamlined server provisioning in collaboration with the Ops team for efficient and scalable deployments.
 - Participated in various project activities, including creating UI mockups, writing technical documentation, conducting client demonstrations, and leading agile ceremonies.
- Angular / Spring Boot / Docker / Kubernetes / Jenkins / Nexus / Jest
- 8/2023 - 1/2024 **Full Stack Web Developer | AWS DevOps - Independent** XOAUTO
- Participated in the entire life-cycle of the application, including design, coding, testing, implementation, deployment, as well as support and maintenance by collaborating with other developers.
 - Deployed the platform using AWS services, managing EC2 instances, RDS, S3, CloudFront, VPC, and CI/CD pipelines, ensuring scalability, security, and high availability, with optimized performance and cost.
 - Developed an advanced search engine, enabling visitors to quickly find ads matching their criteria, while integrating the option for notifications to be alerted as soon as a corresponding ad is posted.
- Angular / Spring Boot / AWS / Jest / MongoDB
- 6/2023 - 8/2023 **Software Developer - Intern** SFM GROUP, Tunis
- Implemented an internet connection quality testing feature for a telecom website using the LibreSpeed library, allowing users to test their internet speed and connection quality.
 - Designed and implemented database schemas to store test results and user data, ensuring efficient data storage and retrieval.
 - Utilized data mining techniques to analyze test data and display comprehensive statistics and insights in a backoffice dashboard enhancing data-driven decision-making for the telecom company.
- React / NodeJs / Python3
- 7/2022 - 8/2022 **FullStack Web Developer - Intern** MINISTRY OF TRANSPORTATION, Tunis
- Developed and integrated a new feature in an existing web application to track import requests for vehicles for people with disabilities.
 - Created a scheduled job using CRON to send daily SMS notifications to users about their demand updates, leveraging third-party SMS APIs.
 - Collaborated with cross-functional teams to ensure seamless integration and optimal functionality of the new feature within the existing web application.
- Symfony / PostgreSQL
